ANYTHING. EXCEPT ORDINARY.

Clean, purist lines. Exclusive fronts and fascinating details. Colours and materials that enter a harmonious dialogue and are in balance with practical design. A nolteneo kitchen makes spaces into a statement, and is an expression of individuality and freedom of choice. From a wide range of planning options to exclusive fronts and design elements, nolteneo opens up entirely new dimensions in individualisation. Besides the elements that are featured in every nolteneo kitchen, there's also an extensive choice of exceptional models and designer elements.

NOLTE LIVING – MORE THAN KITCHENS

For over 60 years, the Nolte name has stood for top-quality kitchens, made in Germany. And since life today is shifting more and more to the kitchen, Nolte also offers home furniture that provides a smooth transition from the kitchen to the living space, and vice versa. Whether it's a sideboard, TV cabinet, or furniture with optional integrated home office – the uniform appearance between the living space and kitchen flows to ensure a harmoniously matched style. With Nolte LIVING you can also design many more living spaces. An extensive range guarantees variety in all spaces.

The utility room used to be an integral part of every household. Then it tended to go out of fashion, mainly for reasons of space – after all, living space has become increasingly expensive. But this is precisely why it is being rediscovered – and completely redefined: a utility room not only perfectly complements modern, design-focused kitchens, it gives the entire household a clearer and more practically organised structure.

MOMENTS OF WELLNESS

It isn't just in kitchens and living spaces that Nolte is always first choice. Now there is the youngest member of the family Nolte SPA – exquisitely designed and manufactured in top quality at Nolte Küchen, Germany's favourite kitchen brand. Here, above all, it's the details that make the difference: From attractive decors also on the inside of cabinets, to MatrixArt, the handleless bathroom.

” We don't see sustainability as a trend. For us, sustainability means treating people, the environment and nature with respect. **“**

Sustainability has always been a part of Nolte Küchen's corporate policy. Social responsibility, protecting the environment and conserving natural resources are always taken into account in our daily actions and thoughts in order to achieve lasting improvements for people and nature.

OUR COMMITMENT TO ...

THE COMPANY

As a matter of good corporate governance and the associated values, we have established resilient structures, processes and partnerships over a period of many years. High quality; modern aesthetics, sustainability and an attractive price-performance ratio are the factors that are always taken into account in our product range. So, for instance, over 99% of the woods we use complies with the principles of sustainable wood criteria.

THE PEOPLE

Our members of staff are particularly close to our heart. Their dedication, knowledge, experience and curiosity are what define us as Nolte Küchen. For this reason, we are pleased to assist our staff in furthering their development – both on the work side through basic and further training as well as on a private level by respecting and enhancing their work-life balance.

THE ENVIRONMENT

As a company, we have made it our aim to maintain a responsible and sustainable use of natural resources. Thanks to our effective climate management, we are able to manufacture our products in a climate-neutral manner at our two operating bases in Löhne and Melle. The main fuel sources at Nolte Küchen are certified green electricity and our boilers, which operate with offcut wood from production.

THE SOCIETY

Ever since Nolte Küchen was first founded, we have cultivated close ties with the region, and we actively foster its well-being and growth. Social commitment is a tradition for us, and we have placed great emphasis on it from the very first day. We help people and regions in emergency situations, such as educational institutions, associations and foundations that are involved in child protection. Our credo: support is given where support is needed.

**NOLTE
SUSTAINABILITY
REPORT**

The kitchen is the room of rooms.
We probably *live* more,
and more *intensively*,
here than anywhere else in the home.
It is the place where
we meet, where we encounter others.
As family or friends.
As a couple.
We *cook, eat* and *enjoy* ourselves
in the kitchen. And sometimes we have
all the time in the world as we do so.
We argue. And *make up again*.
We read, write, send emails, post messages.
And maybe philosophise a little.
And – quite secretly – the kitchen sets
the rhythm of our day.
Good morning. Then midday. Then evening.
And sometimes night ...
Which is *why we love* the kitchen.

Living in the kitchen. nolte
